Applications

Netter series FSW frequency and voltage converters convert the local main voltage into protection voltage.

They are particularly suitable for the operation of Netter internal vibrators series NCZ, NCZ/S, NCX and NCX/S as well as external vibrators series NEG/NEH.

The frequency and voltage converters are available with 42 V or 250 V secondary voltage. FSW converters are equipped with the maximum possible number of CEE (32 A) power sockets.

The required power performance is determined by the internal vibrators to be connected.

A thermal motor protection switch shuts the unit off when current consumption levels are too high.

Safety

Personal safety is assured by means of galvanic isolation.

Permissible operating conditions

Connecting values:
FSW 2 to FSW 45: primary 400 V, 50 Hz, secondary 42 V, 200 Hz

Ambient temperature:

0°C to 40°C.
