

Pressure Sensor with Thread Connection

Application

- hydrostatic level measurement of vessels and tanks
- precise pressure measurement in vessels and pipes

PressureSCAN

Application Examples

- pressure monitoring
- level measurement with dan-..., linearization and evaluation with pem-dd (6 standard styles, 1 style programmable)

Process Connection

- for all standard thread connections (M12x1,5; G1/4"; G1/2"; M22x1,5) and special threads possible
- sensor completely made of stainless steel
- protection class IP69K

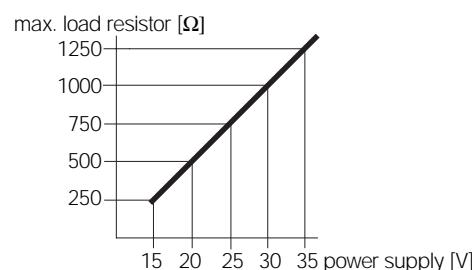

Features

- robust design
- piezo-resistive measurement cell
- integrated 2-wire measurement transducer 4-20mA

Options / Accessories

- special measurement ranges
- absolute pressure measuring
- electrical connection via M12-plug-in
- cable for M12-plug-in ex work
- level measurement device pem-dd with linearization

Diagram load resistor

dan-047 / M12

Specification

Pressure ranges	standard	0,4 / 0,8 / 1,2 / 2,0 5,0 / 10,0 bar rel.	Temperature ranges	ambient	-20...+60°C
Overload stability	factor	2 of full scale minimum 2 bar		process compensated	-40...+120°C short-time 0 ... 85°C
Process connection	thread	M12x1,5; M22x1,5; G1/4"; G1/2";	Linearity	variation	<±0,2% of full scale
Materials	connector head	SS V2A, (1.4305)	Accuracy	zero span	4mA ± 0,15mA 16mA ± 0,1mA
	thread connection	SS V4A, (1.4571)	Temperature drift	zero typical span typical	0,02% o. f. scale / K 0,02% o. f. scale / K
	membrane	SS V4A (1.4435)	Electr. connection	cable entry optional	PG (M16x1,5)2x1,5mm ² M12-plug-in SS, V2A
Protection class		IP69K	Output	current loop optional	4-20mA 0-10V; 0-20mA
			Power supply		12...36V DC
			Load resistor	max.	200...1250Ω; s. diagr.

Order Code

Type	Process connection	Range [bar]	Electrical connection	
dan-045	M12x1,5	0,4 / 0,8 / 1,2 / 2,0	PG* cable entry	
dan-046	G1/4"	5,0 / 10,0 relative	M12 M12-plug-in	
dan-047	G1/2"			
dan-048	M22x1,5			
dan-049	special thread			
Order example:	dan-045 / 2,0 / M12			

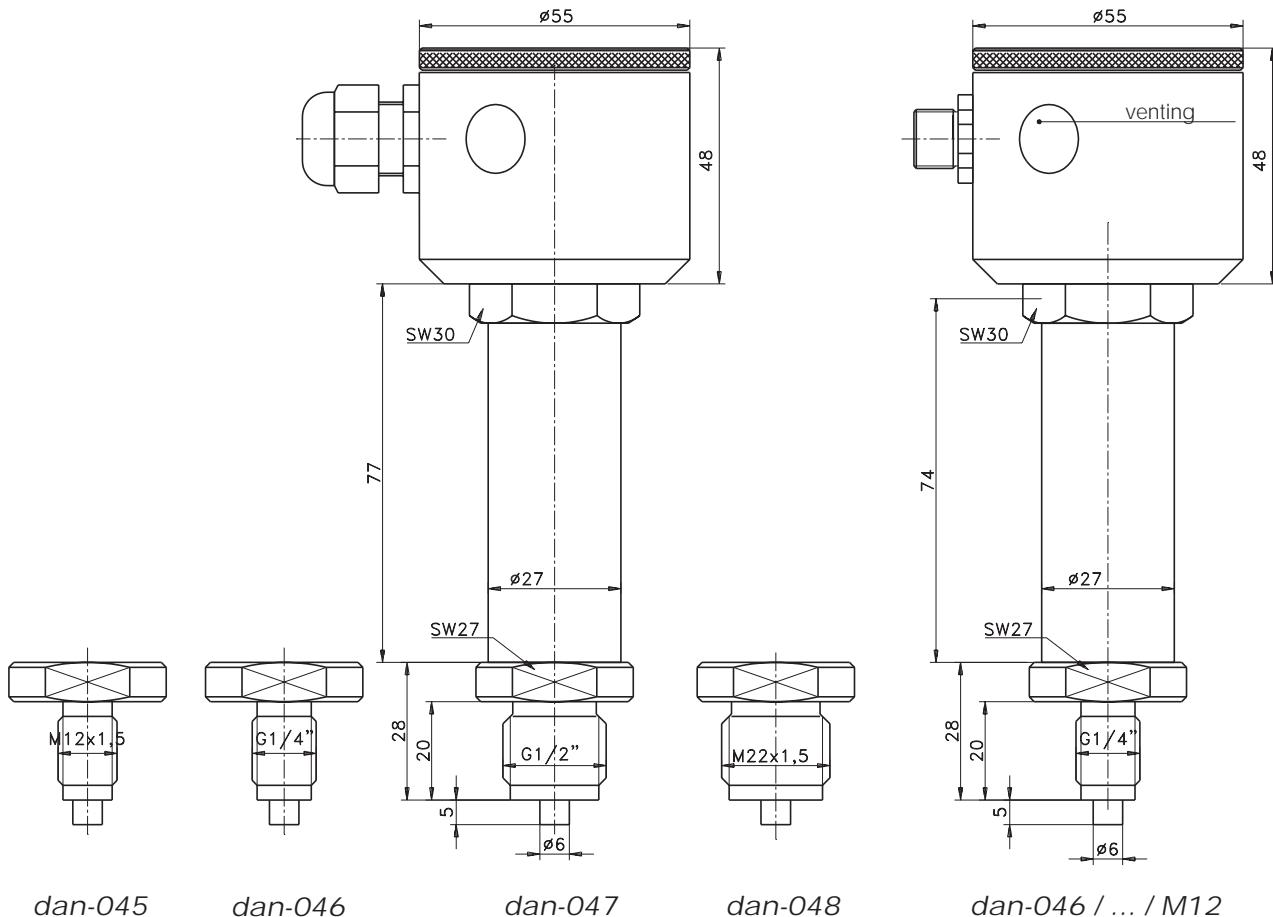

*Standard,
no declaration
needed.

negele

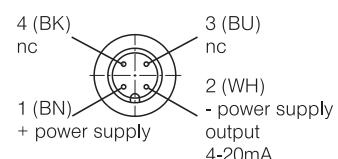

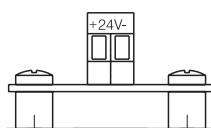

Attention:

Avoid pressure strikes, because these high overloads can damage the sensor!
